

WASZP[®] .com

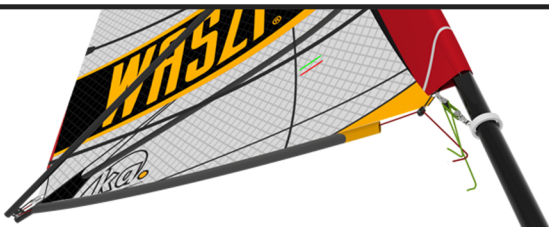

THE ONE DESIGN FOILER

The WASZP delivers a platform for beginner foilers to advanced racers.

An affordable, modern, durable, easy to learn and race class that brings a new definition of fun.

EASY LAUNCHING

Retractable foils that can be pushed down on the water
Gets rid of one of the biggest sore points of the standard Moth
- putting the foils in from underneath in the water or carrying the boat on its side from the shore

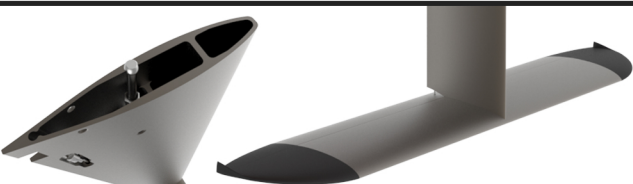

FREE STANDING RIG

Very fast to rig & no stays to hurt yourself on
Much easier to get back on the boat after a capsize
Easy to change rig size (the young one sails with the small rig in the morning while mum or dad race it in the afternoon)

ADJUSTABLE WING ANGLES

Low for a stable learning platform
High for cruising or racing
Up for compact storage

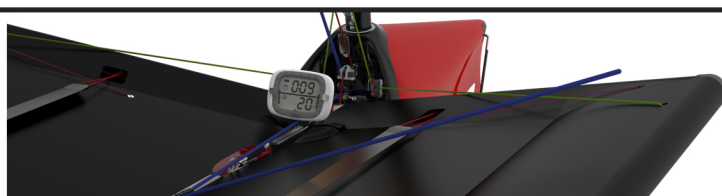

ALLOY FOILS

Extruded sections and the mechanical hinge systems gets rid of deviations found in composite foils in a Moth
Replacement foils will be very cost effective

SIMPLE CONTROL SYSTEMS

Reliable and easy to operate
Just three adjustable rig controls allows sailors to concentrate on having fun

READY TO RACE

The aim is to quickly establish the WASZP as an WS (ISAF) international manufacturer controlled class. The class rules will enforce no substitution on core hull parts, rig or foils
- everyone will have the same WASZP supplied equipment
